Success story

The “National Programme for Improvement of Safety and Working Conditions” is a 3-month health programme that promotes healthy lifestyles and physical activity in workers aged ≥ 50 years. The programme involves sports activities and training workshops, and employees take part in exercise sessions three times a week during working hours under the supervision of trained instructors. The programme has resulted in less musculoskeletal pain, more physical activity and improved anthropometrics among participants.
MONITORING AND SURVEILLANCE

National recommendations on physical activity for health

TARGET GROUPS INCLUDED

- Children (<5 years)
- Children and adolescents (6–17 years)
- Adults (18–64 years)
- Older adults (> 65 years)
- Frail and very elderly adults (> 85 years)
- Pregnant and breastfeeding women
- People with disabilities
- People with chronic diseases

National recommendations are being developed and should be finalized in 2018.

Level of physical activity

ESTIMATED PREVALENCE OF SUFFICIENT PHYSICAL ACTIVITY LEVELS

- 24% Children & adolescents 11–15 years
- 30% Boys
- 19% Girls
- 88% Adults & older adults 15–69 years
- Overall

Adults are considered physically active if they do 150 min/week of moderate-intensity physical activity and bone- and muscle-strengthening activities twice a week.

Monitoring and surveillance of physical activity

SECTORS WITH SURVEILLANCE SYSTEMS

- Health
- Education
- Sports
- Transport

The Physical Activity of Society Survey is conducted by the Ministry of Sport and Tourism to estimate physical activity levels with the International Physical Activity Questionnaire. Poland monitors the physical activity of adolescents in the Health Behaviour in School-aged Children survey.
POLICY RESPONSE

Funding allocated specifically to physical activity promotion by sector

The “National Talent Base” is a publicly available tool for monitoring physical fitness. Somatic measurements and the results of physical fitness tests are used to compare the performance of participants with that of the general population. In 2017, nearly 2 million results of physical fitness tests were entered into the National Talent Base system.

The Ministry of Sport and Tourism implements a programme through which it is possible to obtain funding for the construction or modernization of recreational infrastructure such as swimming pools, sports fields and outdoor gyms. The programme aims to ensure each municipality has a full-size gymnasium and each county has an indoor swimming pool. The goal is to increase the overall number of recreational facilities and increase access. The Ministry has published a study on its website which provides guidance on the management and maintenance of sport facilities.

Target groups addressed by national policies

- Low socioeconomic groups
- Pregnant and breastfeeding women
- Ethnic minorities
- People deprived of liberty
- Migrants
- Older people
- People with disabilities
- People with chronic diseases
- Other

Sectors that are involved in each of the national policies or action plans to promote physical activity

<tr>
<td>All mandatory</td>
<td>All mandatory</td>
</tr>
</tbody>
</table>

Primary schools must provide 3 h/week for children in grades 1–3 (7–9 years) and 4 h/week for children in grades 4–8 (10–15 years).

Upper-secondary schools must provide 3 h of physical education per week.

Physical education teachers are supervised internally by the school headmaster, who observes their work daily. The headmaster is supervised externally by a regional education authority.

### Promotion of physical activity in the workplace

- **Active travel to and from the workplace**: Not mandatory
- **Physical activity during school breaks**: Not mandatory
- **Physical activity during lessons**: Not mandatory
- **Physical activity programmes after school**: Not mandatory
- **Promotion of physical activity in the workplace**: Mandatory
