Country Consultation on integrated NCD surveillance

Vilnius, 8 – 9 December 2014

13 November 2014

PROVISIONAL AGENDA

1. Presentation of an overview of current health monitoring systems in place for the countries of the EU: the set of European Core Health Indicators (ECHI); the Global Monitoring Framework on NCDs; and the targets and indicators of Health 2020. Discussion on an analysis of overlap and differences.

2. Presentation of an overview of key international databases and the degree to which they already hold data stipulated in the indicator systems. Discussion on the completeness and quality issues of the existing data.

3. Presentation of a pilot set of data against the indicator systems of participating countries. Discussion on data comparability, and availability of data broken down by age, sex and/or socio-economic risk factors in order to address inequalities.

4. Sharing national good practice examples on implementation of integrated NCD monitoring and surveillance frameworks. Discussion on lessons learnt from these practice examples.

5. Presentation and discussion on innovative datasets and comparative analysis.

6. Agreement on next steps in Europe for integrated NCD surveillance and monitoring including a discussion on how to address remaining data challenges, gaps, and quality issues.
