Medipol University
Istanbul, Turkey, 18 October 2010

Zsuzsanna Jakab
WHO Regional Director for Europe
Definition of public health

“Public health is the science and art of preventing disease, prolonging life and promoting health through organized efforts of society”

– Sir Donald Acheson, 1988
My main themes

• Strengthening of public health and health systems across Europe
• Interrelationship between health and human development
• Public health as knowledge and action in modern societies
Life expectancy at birth, in years

Opening Ceremony, Medipol University
Istanbul, Turkey

New European health policy: Health 2020

• Will be developed through participatory process with Member States, sectors and partners
• Will be informed and underpinned by a European study on social determinants
• Will integrate policy areas and renew the Regional Office’s commitment to public health
• Will renew emphasis on further developing public health systems, capacities and functions and promoting public health as a key function in society
• Will clarify the links between public health and health care system, particularly primary health care (Tallinn Charter, 2008)
• Will position health as a critical development sector, and make links with the other sectors to promote health as a governmental responsibility under the health ministry
• Will be an inspiration to Member States to develop, renew and update their national health policy and strategies
• Will be led by the Global Policy Group
Essential public health functions

1. Monitoring, evaluation, and analysis of health status
2. Surveillance, research, and control of the risks and threats to public health
3. Health promotion
4. Social participation in health
5. Development of policies and institutional capacity for public health planning and management
6. Strengthening of public health regulation and enforcement capacity
Essential public health functions

7. Evaluation and promotion of equitable access to necessary health services
8. Human resources development and training in public health
9. Quality assurance in personal and population-based health services
10. Research in public health
11. Reduction of the impact of emergencies and disasters on health
WHO European review on social determinants and the health divide

Provide evidence on the nature and magnitude of health inequities across the Region and their relationship to social determinants.

Investigate gaps in capacity and knowledge to improve health through action on social determinants.

Synthesize evidence on the most promising policy options and interventions for addressing social determinants and reducing health inequities in diverse country contexts.
Country work guided by the Tallinn Charter

Synthesizing evidence from a very diverse Region

Alcohol-attributable burden of disease as proportion of all DALYs, by sex and WHO region, 2004
Summary

The WHO Regional Office for Europe will:
• develop a coherent European health policy;
• promote a renewed political commitment to the development of comprehensive national health policies, strategies and plans;
• maintain our commitment to strengthening health systems;
• promote public health capacity, functions and services; and
• ensure a commitment and investment in disease prevention and health promotion.
