Summer School on Refugee and Migrant Health

Managing the public health aspects of migration

Programme

Syracuse, Italy
10–14 July 2017

The Summer School on Refugee and Migrant Health is organized by the WHO Regional Office for Europe with the support of the Italian Ministry of Health and the Sicily Regional Health Authority, and in collaboration with the International Organization for Migration, the European Commission and the European Public Health Association.
A message from the WHO Regional Director for Europe

It is an honour to welcome you to the inaugural Summer School on Refugee and Migrant Health. You are now part of a pioneering movement to enhance the way in which the WHO European Region and the world approach the health and health care of refugees and migrants. The Summer School aims to improve all participants’ knowledge and understanding of the primary health issues and needs of such populations, as well as the broader public health and health system implications of large-scale migration in origin, transit and destination countries. This course bridges research and policy with practice, sharing practical, real-world knowledge and experience and fostering debate and critical thinking.

The theme of the first Summer School is “Managing the public health aspects of migration”. The five days of this intensive course offers both lectures by experts and practical, hands-on exercises. In order to provide participants with first-hand knowledge of how the authorities in Italy currently manage public health challenges related to migration, the Summer School includes a field trip to a point of entry in Sicily that receives regular arrivals of refugees and migrants.

In addition to the course curriculum, you are invited to take advantage of the many networking opportunities that the course offers through social events and the possibility for course alumni to connect with the migration and health work of the WHO Regional Office for Europe through its Knowledge Hub on Health and Migration and other ongoing initiatives.

In closing, I strongly encourage your thoughtful contributions and input to the discussions, question-and-answer sessions and workshops. The strength of the Summer School will largely depend on the interaction and participation of all involved.

Thank you for your commitment and dedication to the health and well-being of refugees and migrants. I look forward to future collaboration on refugee and migrant health throughout the European Region and beyond.

Dr Zsuzsanna Jakab
WHO Regional Director for Europe
**Monday, 10 July 2017**

Tuesday, 11 July 2017

09:00–11:00  Plenary Session One: Cross-cutting perspectives for managing the public health aspects of refugee and migrant movements

Global perspectives influencing refugee and migrant health are introduced. An overview of the main legal frameworks related to refugee and migrant human rights will be discussed from a health perspective. Cultural contexts of health and well-being will be covered, along with why incorporating cultural awareness in policy-making is critical for public health.

**The right to health of migrants**
- Fanny Dufvenmark, Migration Law Expert, International Organization for Migration

**Rights-based approach to refugee and migrant health**
- Åsa Nihlen, Technical Officer, Gender and Rights, WHO Regional Office for Europe

**Culture and co-production in migrant health programmes**
- Roberta Blivins, Professor of History, University of Warwick

**Moderator:** Nils Fietje, Research Officer, Division of Information, Evidence, Research and Innovation, WHO Regional Office for Europe

11:00–11:30  Healthy break

11:30–13:30  Plenary Session Two: Health system leadership, capacity and financing for refugee and migrant health

Large population movements challenge national health system capacity to address the health rights and needs of refugees and migrants in countries along the migration routes to Europe. Multisectoral approaches and intercountry collaboration and coordination are key elements of an adequate response. Political sensitiveness and security concerns often drive national actions. Effective health leadership can overcome those concerns and re-orient priorities that promote political negotiation and innovative governance mechanisms within and among countries. Health systems are strongly influenced by their country context, such that no specific health system design or “best practice” can be used as a universal model for all countries. Effective delivery of health interventions, skilled and motivated health personnel, and sustainable and equitable financing are essential to address migrant health needs and rights. Health leadership can influence the political agenda. The essential public health system functions proposed by WHO provides a useful framework to assess, analyse and identify gaps in migrant health services delivery.

**Addressing the complexity of refugee and migrant movements from a health perspective**
- Santino Severoni, Coordinator, Migration and Health, WHO Regional Office for Europe

**Assessing health systems capacity: presenting the WHO toolkit and the findings of country assessments**
- Giuseppe Annunziata, Senior Adviser, Migration and Health, WHO Regional Office for Europe

**Financing migrant health and the economics of ill-health prevention**
- Franco Sassi, Director, Centre for Health Economics and Policy Innovation, Imperial College London

**Moderator:** Bernadette Kumar, Director, Norwegian Centre for Migration and Minority Health

13:30–14:30  Lunch break

14:30–17:00  Workshops

Participants are invited to attend one of the four concurrently offered workshops. The workshops highlight selected topics with in-depth focus and enable the practical application of information and knowledge delivered in the plenary sessions. Participants will critically examine a variety of concepts and approaches to migrant and refugee health and consider their practical application in a country and an inter-country context to improve the health and well-being of migrants and refugees.
Tuesday, 11 July 2017 (continued)

14:30–17:00 Workshop One: Planning in advance to manage large influxes of refugees and migrants
Key components of an operational plan to address the health needs and rights of refugees and migrants along migration routes to Europe will be described, along with the steps needed for its development. The Sicilian regional contingency plan will be presented as an example.

Facilitators:
• Giuseppe Annunziata, Senior Adviser, Migration and Health, WHO Regional Office for Europe
• Kolitha Wickramage, Coordinator, Global Migration Health Research and Epidemiology, International Organization for Migration

14:30–17:00 Workshop Two: Risk assessment, public health profiling and health services planning
Good practices and tools for assessing health risks of migrants and refugees in receiving communities during different stages of mobility will be explored. Developing the public health profile of various mobile populations and planning adequate health services to address their needs will be discussed.

Facilitator:
• Colleen Acosta, Epidemiologist, Emergency Information and Risk Assessment, WHO Regional Office for Europe

14:30–17:00 Workshop Three: Migrant health information management
The aim is to gain a deeper understanding of the challenges and good practices related to data collection, analysis and reporting to monitor the health of migrants and refugees, both during a migration emergency and after resettlement. Participants will be able to identify key migration-related indicators, understand the importance of standardization in the way data are collected and exchange experiences in designing and implementing migrant health information systems.

Facilitator:
• Bernd Rechel, Researcher, European Observatory on Health Systems and Policies

14:30–17:00 Workshop Four: Communicating with purpose on health and migration
The goal is to provide insight into the importance of communications for generating change and to assist participants in developing strategic communication plans on health and migration within their own spheres of influence. Participants will also learn how effective communication can affect public perception and influence policy, the integral link between evidence and storytelling for growing support and building engagement, and the importance of preparation and planning to mitigate communications crises.

Facilitator:
• Alison Sanders Zimmer, Communications Adviser, Migration and Health, WHO Regional Office for Europe

17:00–17:30 Health practice on the front line
A discussion on the dangerous Mediterranean crossing endured by many refugees and migrants will be supported by first-hand experience. Pietro Bartolo provides treatment to refugees and migrants on their arrival to Lampedusa and Antonio Candela draws on his work coordinating the health response in Lampedusa and the Palermo region during the European migrant crisis.

Speakers:
• Antonio Candela, Director General, Palermo and Lampedusa Health Authority
• Pietro Bartolo, Medical Doctor and Director of Lampedusa Health Service

Briefing on the field trip
Wednesday, 12 July 2017

08:00–18:00 Field trip

After the closure of the “Balkan route,” Italy has served as the main point of entry to Europe for migrants and refugees. The International Organization for Migration reports that, in 2017 (through 4 June), 71,418 migrants and refugees entered Europe by sea, with nearly 85 per cent arriving in Italy.

The Italian authorities have gained significant experience in providing search-and-rescue and life-saving interventions to those most in need. The field trip will expose course participants to a simulation exercise including a search-and-rescue operation, a triage exercise and a visit to an emergency centre in a hospital and a bio-containment facility.

<td><strong>Plenary Session Three: The epidemiology of refugee and migrant health</strong></td>
</tr>
<tr>
<td></td>
<td>Although evidence on the burden of disease and the determinants of health of refugees and migrants has increased in recent years, major gaps still remain for certain population groups, diseases and regions of the world. Current knowledge on the health of migrants and refugees will be presented, focusing on communicable diseases, noncommunicable diseases and mental health issues. In addition, gaps in epidemiologic data and recommendations for addressing them will be discussed.</td>

<td><strong>Plenary Session Four: Designing health services for refugees and migrants</strong></td>
</tr>
<tr>
<td></td>
<td>Refugees and migrants represent a growing segment of the population in many receiving countries and they have particular health and communication needs that are frequently different from those of the native population. Speakers will discuss challenges and strategies to provide migrant-sensitive health services and to ensure that any potential emergencies and risks are communicated in a matter-of-fact, fair and culturally sensitive way. The way in which migrant health is communicated to both the migrants and the host country population may create disinformation and ignite mistrust and negative reactions. During the session, speakers will discuss challenges and strategies for organizing migrant-sensitive health services and for delivering correct communication messages.</td>

</table>
| 14:30–17:00  | **Workshop Five: Unaccompanied minors and other groups in vulnerable conditions** | Trends and characteristics of particularly vulnerable groups of migrants and refugees will be discussed. The session will focus on issues pertaining to unaccompanied minors. It provides an opportunity for identifying good practice to protect rights and offer health services tailored to the target group’s particular needs. Facilitators:  
  • Daniela Reale, Head, Child Protection and Children on the Move, Save the Children, United Kingdom  
  • Miriam Orcutt, Lancet Commission on Migration and Health  |                                                                                                                                         |
| 14:30–17:00  | **Workshop Six: Migrants and tuberculosis**            | Addressing tuberculosis among migrants and other mobile populations originating from countries with high rates of the disease represents a big challenge for the health services of receiving countries. Poverty and inadequate living and working conditions increase tuberculosis risks for migrants and native communities. The mobility of these populations is a barrier for insuring continuity of care and completion of treatment. This workshop will explore evidence-based strategies to conduct tuberculosis screening and treatment of migrants as they pass through various countries on their migration route. Facilitators:  
  • Andrei Dadu, Technical Officer, Joint Tuberculosis, HIV/AIDS and Hepatitis Programme, WHO Regional Office for Europe  
  • Silvia Angeletti, Head, Clinical Laboratory, University Campus Bio-Medico, Rome  |                                                                                                                                         |
| 14:30–17:00  | **Workshop Seven: Addressing mental health among refugees and migrants** | Refugees and migrants are particularly at risk of mental health disorders. Recognizing and appropriately treating mental health problems among these populations poses a challenge due to differences in language and culture and because of specific stressors associated with migration and resettlement. This workshop will identify risk factors and strategies in the approach to mental health assessment, as well as in the prevention and treatment of common mental health problems of migrants and refugees. Facilitators:  
  • Head, Mental Health, Psychosocial Response and Intercultural Communication Section, International Organization for Migration  
  • Liliana Osorio, Deputy Directory, Health Initiative of the Americas, University of California Berkeley  |                                                                                                                                         |
| 14:30–17:00  | **Workshop Eight: Intercultural competence and diversity sensitivity** | Race ethnicity, culture, language and religion are some of the factors that characterize diversity among mobile populations. This workshop will identify the key elements for understanding the influence of cultural backgrounds and perceptions and behaviours of migrants and refugees, and the healthcare professionals serving them. Practical approaches to providing health services and education, while taking cultural diversity into consideration, will be discussed. Facilitator:  
  • Felicity Thomas, Co-Director, WHO Collaborating Centre on Culture and Health, Senior Research Fellow, University of Exeter  |                                                                                                                                         |

15:30–16:30 Panel discussion: Role of civil society in managing public health aspects of refugees and migrant movements

Presenters will describe how civil society organizations have a prominent role in shaping public health, health policies, and health outcomes regarding migrant populations. They will discuss the challenges and opportunities the civil society has, especially when working in hostile and anti-immigrant political environments.

Panellists:
- Alyna Smith, Platform for International Cooperation on Undocumented Migrants
- Serena Corniglia, Red Cross Italy
- Apostolos Veizis, MSF Greece
- Daniela Reale, Head, Child Protection and Children on the Move, Save the Children

Moderator: Davide Mosca, Director, Migration Health, International Organization for Migration

LIST OF FACULTY

A

Ibrahim Abubakar is Director of UCL Institute for Global Health. He led the UCL Centre for Infectious Disease Epidemiology, UCL-TB and was a senior investigator at the MRC Clinical Trials Unit. He was head of Tuberculosis at Public Health England. Prior to his appointment at UCL, he was Professor in Health Protection at Norwich Medical School. He qualified in medicine in 1992 and initially trained in general medicine before specializing in public health medicine. His academic public health training was undertaken at the London School of Hygiene and Tropical Medicine, University of Cambridge and University of East Anglia. He serves on/chairs several expert/advisory groups for WHO and the European Centre for Disease Prevention and Control.

Colleen Acosta is an epidemiologist with the Health Emergencies Programme, WHO Regional Office for Europe. She works with the Health Emergency Information and Risk Assessment team where she assists Member States in strengthening surveillance systems for early warning and response, capacities for risk assessment and outbreak investigation, and helps ensure rapid containment of epidemic threats as part of the regional International Health Regulations contact point. Colleen was awarded her PhD in epidemiology from the University of Oxford in 2014. Prior to that, Colleen received a bachelor’s degree from Stanford University and a master’s degree from Johns Hopkins Bloomberg School of Public Health, both in the United States.

Isabel Yordi Aguirre has been a Technical Officer in Gender and Rights for more than 10 years at the WHO Regional Office for Europe and she is currently responsible for gender and human rights for the Division of Policy and Governance for Health and Well-being. The focus of her work has been the development of the Strategy on Women’s Health and Well-being in the WHO European Region, adopted by the Regional Committee for Europe in 2016. With a Master’s Degree in Political Science, she has more than 20 years of experience with various United Nations agencies in the areas of gender, human rights and health. Isabel has lived and worked in Brussels, Geneva, Managua, New Delhi and Copenhagen.

Richard Alderslade has been a Teaching Fellow in Public Health at St George’s Hospital, University of London, since 2013 and continues to act as an Adviser to the WHO Regional Office for Europe, including the Migration and Health programme. He teaches public and global health subjects at Durham and Nottingham universities in the United Kingdom, and at New York University in the United States. He has worked for 35 years in public health, national and local health administration, research and higher education in the United Kingdom, and for 10 years in humanitarian and development international health.

Silvia Angeletti is Head of the Clinical Laboratory and of the Research Unit of Clinical Laboratory Science and a researcher in Clinical Pathology at the University Hospital Campus Bio-Medico of Rome, Italy. She received a degree in Biological Science from Sapienza University of Rome in 1994 and a degree in Medicine and Surgery from the University Campus Bio-Medico of Rome in 2008. Her research interests include infectious disease diagnosis, multidrug resistant pathogens, diagnostic markers of infectious and chronic diseases, epidemiology, and laboratory markers of inflammation and infection, among others.
Giuseppe (Pino) Annunziata is a Senior Adviser for the Migration and Health programme at the WHO Regional Office for Europe. He has worked in Europe, the Middle East, Asia and Africa, and has more than 20 years of service at WHO at the country, regional and global levels. He is an expert on migration, health and international humanitarian crises. A former Director of the WHO Rapid Response and Operations at headquarters and Chief of Knowledge and Information Management at the WHO Centre for Health Risk Reduction in Tunis, he has been a team leader of several WHO country assessments aimed at understanding the capacity of national health systems to manage influxes of refugees and migrants. In his free time, he is a voluntary clinician providing primary health care to seasonal migrant workers.

Giannis G. Baskozos is an endocrinologist by training and served as Vice-President and Chairman of the Hellenic Endocrine Society, the scientific and professional association of Greek endocrinologists. He served as First Vice-President of the Panhellenic Medical Association. He has been the Secretary General for Public Health in the Ministry of Health since 2015. He is coordinator of the committee for health coverage of refugees, migrants and vulnerable groups, head of the Committee for the National Action Plan of migration and health, responsible for the development of international cooperation of the Ministry of Health and for the cooperation with WHO and other international organizations. He is also a member of the Twenty-fourth Standing Committee of the WHO Regional Committee for Europe.

Roberta Bivins is Professor of History at the University of Warwick. Since 2004, she has studied the impacts of immigration and ethnicity on post-war British health, medical research and practice funded by the Wellcome Trust. In 2015, she published her findings as a book, *Contagious Communities: Medicine, Migration and the NHS in Post War Britain* (Oxford University Press). Since 2015, Roberta has led a team of researchers investigating the cultural history and influence of the British National Health Service (NHS) 1948–2018, funded by a £1.2-million Wellcome Trust award. Her research focuses on efforts by politicians, medical professionals and health policy experts to enact social policy and cultural agendas through and within the NHS, particularly in relation to ethnic minorities.

Katarina Carlzén heads the work of the Partnership Skåne, a system-based and holistic support platform for developing the integration of newly arrived refugees and asylum seekers, connecting more than 20 projects at the regional and national levels. The central components include culturally sensitive and mother tongue-based social and health communication and close cooperation with civic society and academia. The work is carried out in a cooperative process, where the target group has a direct influence on the process. The work serves as an example for other regions in Sweden and its main components are being nationally disseminated, contributing to national policy-making. She has a Master’s Degree in International Migration and Ethnic Relations.
Xóchitl Castañeda has been the Director of Health Initiative of the Americas at the School of Public Health, University of California Berkeley, since 2001. A medical anthropologist by training, she was educated in Guatemala and Mexico. She completed a postdoctoral fellowship in reproductive health at the University of California San Francisco, and received training in social science and medicine at Harvard and Amsterdam universities. Her vision and commitment have led to the creation of multiple binational health programmes, including Binational Health Week, one of the largest mobilization efforts in the Americas to improve the well-being of Latin American immigrants. Through these strategies, hundreds of thousands of Latinos in the United States have received medical attention and referrals for services.

Fanny Dufvenmark works as a Migration Law Expert in the International Migration Law Unit at the International Organization for Migration (IOM) in Geneva, Switzerland. She has an LL.B in Law and International Relations and a LL.M in International Criminal Law from the University of Sussex. Prior to joining IOM in 2011, Fanny worked with law firms in Sweden as well as with the Trial Watch Project in Switzerland. Her area of focus is the international legal framework surrounding migration, in particular human rights law, refugee law and transnational criminal law. Furthermore, she has developed the framework for the rights-based approach to programming for IOM.

Ranieri Guerra is Director-General of Preventive Health and Chief Medical Officer at the Ministry of Health of Italy. He was previously the Science and Technology Attaché at the Embassy of Italy in Washington, D.C. He is also the former Director of URE, External Relations Office, the President’s Cabinet, Istituto Superiore de Sanità (ISS), or National Institute of Health, Rome, Italy. His role at the ISS included management activities on health system reform, equity and impact assessment, capacity-building and institutional development at central and intermediate levels, especially in public–private systems. Since 2000, Dr Guerra has worked as a consultant and team leader for UNICEF, UNDP, WHO and the Italian Ministry of Foreign Affairs on projects in Palestine, Eritrea, Uganda, Rwanda, Burundi, Swaziland and China.

Andreas Kamm has been Secretary General of the Danish Refugee Council since July 1998. He has a Master of Arts in History and has worked as a teacher, the principal of a Danish Refugee Council language school, an educational adviser and a labour market adviser. For a number of years, Mr Kamm was the head of the Danish Refugee Council’s Central Integration Department in Copenhagen, Denmark. He is also a member of the official Danish delegation to the annual executive meetings of the United Nations High Commissioner for Refugees, and the chairman of the Council of Human Rights, under the Danish Institute for Human Rights.

Allan Krasnik is President of the Section for Migrant and Ethnic Minority Health of the European Public Health Association, consisting of more than 1000 researchers and professionals specifically engaged in the health of migrants and ethnic minorities. His main scientific expertise is health services research with a special focus on prevention, health care innovations and reforms and their effects on social and ethnic equity in health care access and health outcomes. He is a professor at the Department of Public Health, University of Copenhagen, as well as a founder and senior researcher at the Summer School on Refugee and Migrant Health.
Danish Research Centre for Migration, Ethnicity and Health (MESU), and a principal investigator in a large project on the health and welfare of migrants in Nordic countries.

**Bernadette Kumar** has been Director of the Norwegian Centre for Migration and Minority Health since 2010 and Associate Professor in Global Health at the Institute of Health and Society, University of Oslo, since 2013. She graduated in medicine with a residency in surgery (1988) in India, and received her doctorate in Epidemiology and Public Health from the University of Oslo, Norway (2006). She has several years of international experience working for UNICEF, WHO, WFP, the World Bank and the Norwegian Agency for Development Cooperation in southern Sudan, Somalia, north west Kenya, West Bank and Gaza, Democratic People’s Republic of Korea, China and Bhutan (1989–2000), where she worked as a technical expert and consultant.

**Isabel de la Mata** is Principal Advisor for Health and Crisis Management in the European Commission. She has previously worked as a Counsellor for Health and Consumer at the Permanent Representation of Spain to the European Union, as Deputy Director General for Health Planning at the Spanish Ministry of Health, and as Adviser to the Vice Minister of Health. She has also worked with WHO, including as a member of the Standing Committee of the Regional Committee for Europe, the Pan American Health Organization, the Inter-American Development Bank and the Spanish Agency for International Cooperation. Dr de la Mata graduated in Medicine and Surgery from the University of the Basque Country and holds post-graduate degrees in Public Health and Hospital Administration and Statistics.

**Davide T. Mosca** has been Director of Migration Health at the International Organization for Migration (IOM) headquarters in Geneva, Switzerland, since 2008. Initially, he worked as a surgeon for Italian Technical Cooperation but later shifted his focus towards public health. In 1994, he joined IOM, where he designed programmes for the reintegration of internally displaced people, returning refugees and demobilized soldiers. As Director of the Migration Health Department, Dr Mosca manages IOM health programmes worldwide totalling more than US$ 163 million in 2016, and employing more than 1200 health and operation personnel in more than 60 countries, in the clinical provision of immigration medical examinations and public health-related initiatives with the goal of health promotion for migrants.

**Åsa Nihlén** has been Technical Officer at the WHO Regional Office for Europe since 2008, and part of the Gender and Rights team since 2012. With two master’s degrees – in foreign policy and human rights – she is part of the core team that developed the European health policy framework, Health 2020, for which she also served as the secretariat overseeing its implementation. She has been involved in the development of the Strategy on Women’s Health and Well-being in the WHO European Region. Her current projects focus on strategizing and assessing policies and collaborating with several governments in order to strengthen the women’s health provision and violence prevention institutions.
Miriam Orcutt is Coordinator of the UCL-Lancet Commission on Migration and Health and co-lead for the Forced Migration and Crises Working Group. She is a Visiting Research Fellow at the Conflict and Health Research Group, King’s College London, and a Steering Committee Member of the Syria Public Health Network. She is a former Research Associate with the Humanitarian Innovation Project, Refugee Studies Centre, University of Oxford, and an Academic Foundation Doctor in Epidemiology and Public Health in Newcastle upon Tyne, and is associated with the Public Health in Humanitarian Crises Group at the London School of Hygiene & Tropical Medicine. She holds an MSc in Medical Anthropology with Distinction from Durham University and has been awarded an ESRC Studentship to complete a PhD on Syrian refugee health at the Institute of Global Health, University College London.

Liliana Osorio is Deputy Director of the Health Initiative of the Americas (HIA), a programme of the University of California Berkeley, where she has worked since 2002. Since joining HIA, she has led several projects aiming to create awareness, advance knowledge and provide services in the area of migration and health. Some of the projects include the coordination of the annual Binational Health Week, the Binational Policy Forum on Migration and Public Health, and the Summer Institute on Migration and Global Health. Liliana has also managed several state-wide campaigns, such as the “H1N1 Influenza Outreach and Education Campaign to Reach the Hard-to-Reach Latinos in California,” and the “California Covered Education and Enrollment Campaign.”

Bernd Rechel is a Researcher at the European Observatory on Health Systems and Policies. He is based at the London School of Hygiene & Tropical Medicine. Bernd is coordinator, author and editor of the Observatory studies and the Health Systems in Transition (HiT) reviews. His research focuses on health systems and policies, public health and migration and health. Bernd holds a Bachelor of Arts in Sociology, a Master of Arts in Race and Ethnic Studies and a Doctor of Philosophy in Russian and East European Studies.

Tonia Rifaey is a Technical Officer in Country Focus Support at the WHO Regional Office for the Eastern Mediterranean. Dr Rifaey has two decades of combined experience working in research, development and programme planning in the United States and in the 22 countries of the Eastern Mediterranean Region. She received a Bachelor of Arts in political science from Pennsylvania State University, United States (1993), a Master of Arts in Middle East history from the American University in Cairo, Egypt (1993) and a Doctor of Philosophy in sociology, focusing on child labour, from the University of Surrey, United Kingdom.

Alfonso Rodriguez-Lainz is a Lecturer at the Graduate School of Public Health, San Diego State University, United States, where he has been teaching courses on migrant health, global surveillance and international epidemiology. Dr Rodriguez-Lainz is also a Migrant Health Specialist with the Division of Global Migration and Quarantine, Centers for Disease Control and Prevention. He has a Doctor of Philosophy degree in Epidemiology and a Master of Science degree in Preventive Veterinary Medicine from the University of California Davis and a Veterinary Medicine degree from the University of Córdoba, Spain.
Jorge Sampaio is former President of the Portuguese Republic (1996–2006). During his studies in Law at the University of Lisbon, Mr Sampaio became a leader for the restoration of democracy in Portugal, and in the following decades he took numerous cases defending political prisoners. He later served as a member of the European Commission of Human Rights of the Council of Europe. After his term as President of Portugal, Mr Sampaio became United Nations Secretary-General’s Special Envoy to Stop Tuberculosis until 2012, raising the international visibility of the disease. Recently, he has served as a member of the Global Commission on Drugs Policy, where he has advocated for a major reform in policy.

Alison Sanders Zimmer is the communications adviser for the Migration and Health programme at the WHO Regional Office for Europe. During her time at WHO, she has worked in the Division of Health Systems and Health Policy to launch integrated communication strategies and implement tactics for engaging critical audiences in priority efforts for the Region. Her focus areas within WHO have been on the Health 2020 policy framework, people-centred health systems, and refugee and migrant health. Prior to coming to WHO, Ms Sanders served as a Public Affairs Officer with the United States Army, and specialized in influencing and educating highly targeted audiences on rapid acquisition of technology during wartime conflict.

Franco Sassi is Director of the Centre for Health Economics & Policy Innovation and holds a Chair in International Health Policy and Economics. He is also a Senior Health Economist (on leave) at the Organisation for Economic Co-operation and Development (OECD), Paris, where he developed and headed the Public Health Programme. His work has been aimed at assessing the impacts of public policies to tackle major chronic diseases and their predisposing risk factors, including poor nutrition, physical inactivity, alcohol and tobacco use, and a range of environmental and social exposures. Dr Sassi obtained his doctorate in health economics from the University of London; the main focus of his research and publications has been the evaluation of health interventions.

Marc Schenker is a Distinguished Professor of Medicine and Public Health at the University of California Davis School of Medicine. Dr Schenker has over 30 years of experience in medicine and public health. He is the founding director of the UC Davis Center for Occupational and Environmental Health, the Western Center for Agricultural Health and Safety, and the Migration and Health Research Center. His specialty is occupational and environmental disease. He is board certified in internal medicine, pulmonary disease and occupational health. He conducts epidemiologic research and teaches in these areas, with a particular focus on lung disease, reproductive hazards, and the health of immigrants and farm working populations.

Guglielmo Schinina has been Head of Mental Health, Psychosocial Response and Intercultural Communication at the International Organization for Migration (IOM) since 2009. As Head of Section, he has promoted the mainstreaming of psychological, social work and anthropological concepts and practices in the various policies and programmes of the IOM. He is an expert in psychosocial activities in war-torn situations and disasters, with vulnerable migrants and victims of trafficking, and in cultural integration. He has worked as a manager of psychosocial programmes, a psychosocial technical adviser and a psychosocial trainer in more than 50 countries worldwide, in Europe, the Middle East, East and West Africa, Asia and the Caribbean, for various international and nongovernmental organizations and academic institutions.
Santino Severoni is Coordinator of Public Health, and Migration and area programme manager for the Division of Policy and Governance for Health and Well-being at the WHO Regional Office for Europe. He is a medical doctor, health economist and epidemiologist, and is experienced in systems management. For over 24 years, Dr Severoni has worked for governments, multilateral organizations, nongovernmental organizations and foundations in eastern Africa, Balkans, central Asia and Europe. He has dedicated his professional work to public health, health sector reforms, health systems strengthening, health diplomacy, aid coordination/effectiveness, management of complex emergencies and the coordination of the public health aspect of migration work for the WHO Regional Office for Europe.

Felicity Thomas is Co-Director of the WHO Collaborating Centre on Culture and Health and a Senior Research Fellow at the University of Exeter Medical School. As a social scientist, her work draws on participatory, ethnographic and narrative approaches to understand and address health inequalities. She has published widely on issues relating to migration and health, and is editor of the *Handbook of Migration and Health* (2016) and co-editor of *Migration, Health and Inequality* (2013). Dr Thomas is currently working with WHO to develop a toolkit on intercultural competence and diversity sensitivity in migrant health care.

Pavel Ursu is WHO Representative at the WHO Country Office in Turkey. He served as the Head of WHO Country Office in the Republic of Moldova before becoming WHO Representative in Tajikistan from 2010 to 2015, and then transitioning to his current location in May 2015. Previously, Dr Ursu worked as a Project Manager and was then appointed as Head of the International Relations Office at the Ministry of Health before joining WHO in 2001 as a Project Officer. He holds a postgraduate diploma and Master of Science degree in Public Health, and a Master’s Degree in Health Services Management.

Mustafa Uzun has been Vice-President of the Public Health Institute of Turkey, responsible for primary health care services, since 2016. He completed his medical degree in 1997 in Turkey and started his career as a general practitioner in the same year. Dr Uzun was assigned to local level responsibilities in the health sector, serving in the emergency department, before becoming head physician of emergency health services at the provincial level. Previously, Dr Uzun also served as deputy provincial health director from 2004 to 2008, and then worked as a family physician until he was appointed Provincial Health Director in 2012.
Kol Wickramage is the Global Migration Health Research and Epidemiology Coordinator of the International Organization for Migration (IOM) and has worked on a wide spectrum of health programmes, leading IOM’s health programme in Sri Lanka and co-chairing the National Research Committee on Migration Health in that same country, and has provided guidance in formulating national action plans on migration health in other countries. Dr Wickramage has worked with WHO in setting up medical programmes for displaced and forced migrant populations. He has authored 31 peer-reviewed articles and three book chapters at the nexus of migration health, conflict and development. He obtained a Master’s degree in Public Health, a Master’s degree in Human Rights (in Health Law) and a PhD at the Faculty of Medicine.

Nevin Wilson is a medical doctor with over two decades of experience implementing public health, specifically with disease control programmes such as tuberculosis and HIV. He has worked extensively in India as well as in parts of Africa and South-East Asia. His special interests include designing and coordinating the delivery of interventions that prioritize disease control among vulnerable populations, including refugees and migrants. He currently works with the International Organization for Migration (IOM), leading a team operating the IOM Mission in Amman that implements a Global Fund response to HIV, Tuberculosis and Malaria in four countries, including Jordan, Lebanon, Syria and Yemen.
