Capacity-building workshop on gender and health

10-12 March 2009

Maternal newborn and child healthcare project, Albania
ABSTRACT

This workshop was facilitated by staff from the WHO Regional Office for Europe, within the remit of the Spanish-funded Maternal Newborn and Child Healthcare Project in Albania. The main objectives of the workshop were to:

- address gender and gender inequality in health;
- understand the relevance of gender and health in health systems;
- understand gender inequality and health;
- address gender health issues in the context of mother and child health;
- respond to gender in public health programmes; and
- address gender in the project of maternal and child health reform in Albania.

Twenty-nine participants attended, from the Ministry of Health in Albania, the Institute for Public Health, the Ministry of Labour and Social affairs and WHO Country Office, Albania. This report outlines the proceeding of the workshop and highlights the areas that were addressed.

Capacity building workshop on gender and health, 10-12 March 2009

Background and objectives

The gender and health capacity building workshop was delivered as a core component of the overall maternal, newborn and child healthcare (MNCH) project in Albania. This project is a jointly managed by the Ministry of Health and WHO with the financial support of the Spanish Agency for International Development Cooperation (MNCH 2008). Emerging from the MNCH 2008 report, gender was identified as a priority issue for its role in determining access to healthcare, impact on health inequalities and as a determinant of health status. Furthermore the report recommended the mainstreaming of gender in all the project activities.

The objectives of the workshop were to:

• address gender and gender inequality in health;
• understand the relevance of gender and health in health systems;
• understand gender inequality and health;
• address gender health issues in the context of mother and child health;
• respond to gender in public health programmes; and
• address gender in the project of maternal and child health reform in Albania;
• to address MNCH project component 5.3.3 Stewardship: result, activities and sub-activities, more specifically elements ER3, A3.1 and A3.1.1 (MNCH report 2008)
• A3.1 “Assist the MoH in dealing with health inequalities and Socioeconomic and Gender Determinants (SGD) of MNCH” (MNCH 2008).
• A3.1.1 “ Training on Gender Equity and Health, including gender-based violence” (MNCH 2008);
• 22. “To prepare the training workshop on Gender Equity and Health.”;
• to provide an introduction to the key concepts of gender mainstreaming;
• to provide a practical approach to gender mainstreaming for health managers;
• to increase awareness of gender issues among health personnel at MOH and managerial level in all pilot districts of the MNCH project.
Agenda and participants

The agenda of the workshop is in Appendix 1. The international team of facilitators were Isabel Yordi from WHO Regional Office for Europe and Isabel Saiz from the Spanish Ministry of Health and Consumption. The WHO Country Office facilitator was Ledia Lazeri, National Mental Health Professional Officer.

Twenty-nine participants engaged in the training. The detailed list of participants is in Appendix 2. Of these participants 12 were from the Ministry of Health, and 6 from the Institute of Public Health. From the pilot regions identified for the MNCH project, there were two representatives from each region, Korca, Vlora and Shkodra. There were two participants from the Ministry of Labour, Social Affairs and Equal Opportunities. Finally there were six attendees from the WHO Country Office, Albania. Also in attendance for the initial welcoming ceremony were Dr Zamira Sinoimeri Deputy Minister of Health and Dr Anshu Banerjee, Head of WHO Country Office.

Proceedings of the Workshop

Day 1

The first day opened with a welcome from Deputy Minister of Health Dr Zamira Sinoimeri jointly with WHO representative Dr Anshu Banerjee. The WHO facilitator Isabel Yordi detailed the projected programme outline and objectives. She discussed the wider implications and potential utilization of the gender training in terms of health policy development. There followed a general introduction of all participants, detailing professional backgrounds and expected outcomes for the programme. Communication between participants and facilitators was supported at all times by simultaneous translation of English- Albanian/ Albanian-English. Programme documents were supplied and were available in English and Albanian and supplied to all participants.

Module 1 Gender Inequality and Health was introduced, seeking to define the concept of gender. Activity 1 was introduced- Flash Card Facts, that launched good participation and stimulated debate on the sex/gender issue/ social/biological determinants of health. Wider concepts such as gender norms, gender roles, gender relations, gender stereotypes, gender based division of labour were discussed in section 1.2. The subsequent section 1.3 introduced gender mainstreaming, right to health and the linkage between gender and health. This was supported by Activity 2
section 1.4 - the Powerwalk. The activity highlighted differences in gender roles and sought to further understanding of equality, equity and access to resources. Section 1.5 was addressed with significant group participation and discussion. The presentation of the modules were facilitated by Isabel Yordi and Lidia Lazeri. Isabel Saiz also gave a presentation concerning the Spanish Ministry’s experience of gender mainstreaming.

**Day 2**

The second day of training commenced with an active review of the previous day’s topics and self evaluation of learning objectives by participants. This was followed by an introduction to module 2, Gender Analysis of Health Problems. The content of each section of Module 2 was introduced with frequent referral to explanatory text in the participant notes. The concept of a WHO gender analysis matrix was introduced as a tool for the healthcare environment to access the gender components of any healthcare policy or plan. The importance of the practical application of a gender analysis was stressed and with reference to this, the group of participants was divided into three subgroups to perform a gender analysis. The topics for the groups were Pregnancy; sexually transmitted infections and mental health. Each group was allotted approx. two hours to complete the matrix on their respective topics and were supplied with a laptop to fill the matrix and subsequently present the results to the larger group.

The presentation of each group’s results proved to be of great interest to all participants. The participant consensus deemed the matrix to be a useful tool in identifying gender concerns in relation to these topics. Isabel Saiz gave a brief presentation in relation to the Spanish experience of gender mainstreaming. The matrices are in Annex 3.

**Day 3**

The final half- day of the programme commenced with a review of the previous days objectives and learning, with participant self evaluation and general discussion. Topics introduced in day 3 included classification frameworks for gender responsiveness of policies and programmes. This included gender-unequal, gender-blind, gender-sensitive, gender-specific and gender-transformative with frequent reference to further exploratory text in the participant notes. As an active exercise for the practical application of these concepts, the group was again divided into three subgroups and advised to explore their respective topic policy in terms of these classifications. The results of this analysis were presented to the group and discussed.
Ledia Lazeri (WHO Country Office Albania) also presented a poignant photograph of an Albanian family from a rural district showing an elderly mother carrying her disabled son. What was remarkable about this was the ensuing debate about how the photo reflected gender norms and roles inequalities, noting the absence of a male figure from the photo. Finally participants completed an overall evaluation of the training: a sample is located in appendix 4.

Dr Anshu Banjeree and Nedime Ceka representing the Ministry of Health gave final speeches and there was a general discussion on the efficacy of the programme; the consensus appeared positive. Dr Anshu Banerjee asked how participants how they would apply the training in their professional environments and this elicited a positive response. Certificates of attendance validated by WHO and the Ministry were presented to all participants.

Conclusions

In conclusion the workshop effectively addressed the issue of gender in the context of health, emphasizing the assessment of health policy and practices for health managers. The impact of the training is not measurable at present but should contribute in the efforts of the MNCH project to improve mother and child health. As a complement to the training, Dr Anshu Banerjee and WHO facilitators met with the Deputy Minister of Health following the training to re-emphasize the significance of mainstreaming gender in all aspects of health. The implications for the future of health planning and the role of gender were also discussed.

Future implications

As a consequence of this workshop the possibility of carrying out a WHO training course for health professionals on gender-based violence during pregnancy may be considered in one of the three MNCH pilot regions.

Annex 1. Workshop agenda

Provisional Programme

Tuesday, 10 March 2009: Gender mainstreaming for health managers, Day I

09:00–09:30   Welcome
Dr Zamira Sinoimeri
Deputy Minister
Ministry of Health

H.E. Mr. Manuel Montobbio
Spanish Embassy in Albania

Dr Anshu Banerjee,
Albania Country Office

09:30-12:00   Module 1: Gender, gender inequality and health:
Ms Isabel Yordi
Technical Officer Gender and Health
WHO/Europe

M Ledia Lazeri
Mental Health NPO and Gender focal point
Albania Country Office

Understanding the relevance of gender and health in health systems

Concept definition: sex and gender, gender equality and equity, gender and social determinants of health
Ms Isabel Saiz
Women’s Health Observatory
Spanish Ministry of Health and Consumption

12:00-14:00   Lunch

14:00-17:00   Module 1: Gender, gender inequality and health
continuation
M. Isabel Yordi
WHO/Europe

M. Ledia Lazeri
17:00-17:30  Wrap up of the day activities

**Wednesday, 11 March 2009: Gender Mainstreaming for health managers, Day II**

09.00-12:00  Module 2: Addressing and responding to gender in health problems and issues: mother and child health  
Ms Isabel Yordi  
WHO/Europe

Ms Ledia Lazeri  
WHO Country Office  
Ms Isabel Saiz  
Spanish Ministry of Health and Consumption

12:00-14:00  Lunch

14:00-17:00  Module 2: Addressing and responding to gender in health problems and issues  
continuation  
Ms Isabel Yordi  
WHO/Europe

Ms Ledia Lazeri  
WHO Country Office  
Ms Isabel Saiz  
Spanish Ministry of Health and Consumption

17:00-17:30  Wrap up of the day activities

**Thursday, 12 March 2008 Gender Mainstreaming for health managers, Day III**

09.00–12:30  Module 3: Addressing and responding to gender in public health programmes, projects and policies  
Ms Isabel Yordi  
WHO/Europe

Addressing gender in the project of Maternal and Child Health Reform in Albania  
Ms Ledia Lazeri  
WHO Country Office
