In the WHO European Region...

**Suicide** is a main cause of death among adolescents.

Less than 25% of countries allow adolescents to access health services based on maturity without parental consent.

Too many children are not vaccinated.

1 in 4 women drink alcohol during pregnancy.

Less than 5% of children with multidrug-resistant tuberculosis are diagnosed and treated.

18-98% of school children have tooth decay.

Many baby foods have high levels of sugar but are still marketed as suitable for babies.

More than 3000 children are killed on roads each year.

Children are hospitalized up to 20 times more in some countries than others.

Only 1 in 4 babies are exclusively breastfed for 6 months.
