Health systems respond to NCDs:
Welcoming address

Zsuzsanna Jakab
Regional Director
WHO Regional Office for Europe
NCD Outcomes – A success story (?)
HEALTH 2020
European policy framework and strategy for the 21st century
The ambition

Articulate key elements of an aligned and comprehensive health systems response to NCDs.

"The long-term nature of many NCDs demands a comprehensive health system response that brings together a trained workforce with appropriate skills, affordable technologies, reliable supply of medicines, referral system and empowerment of people for self-care, all, over a sustained period of time.”

WHO³

“A key requirement is a comprehensive approach to health system strengthening to deliver services for all common diseases during the life-time, with a patient centered mode of delivery.”

Beaglehole et al.⁴
Country assessments

Country assessments identify health system challenges to and opportunities for improving outcomes for noncommunicable diseases. The guide outlines a five-step process to arrive at policy-relevant and contextualized conclusions.
